

# Separator belts

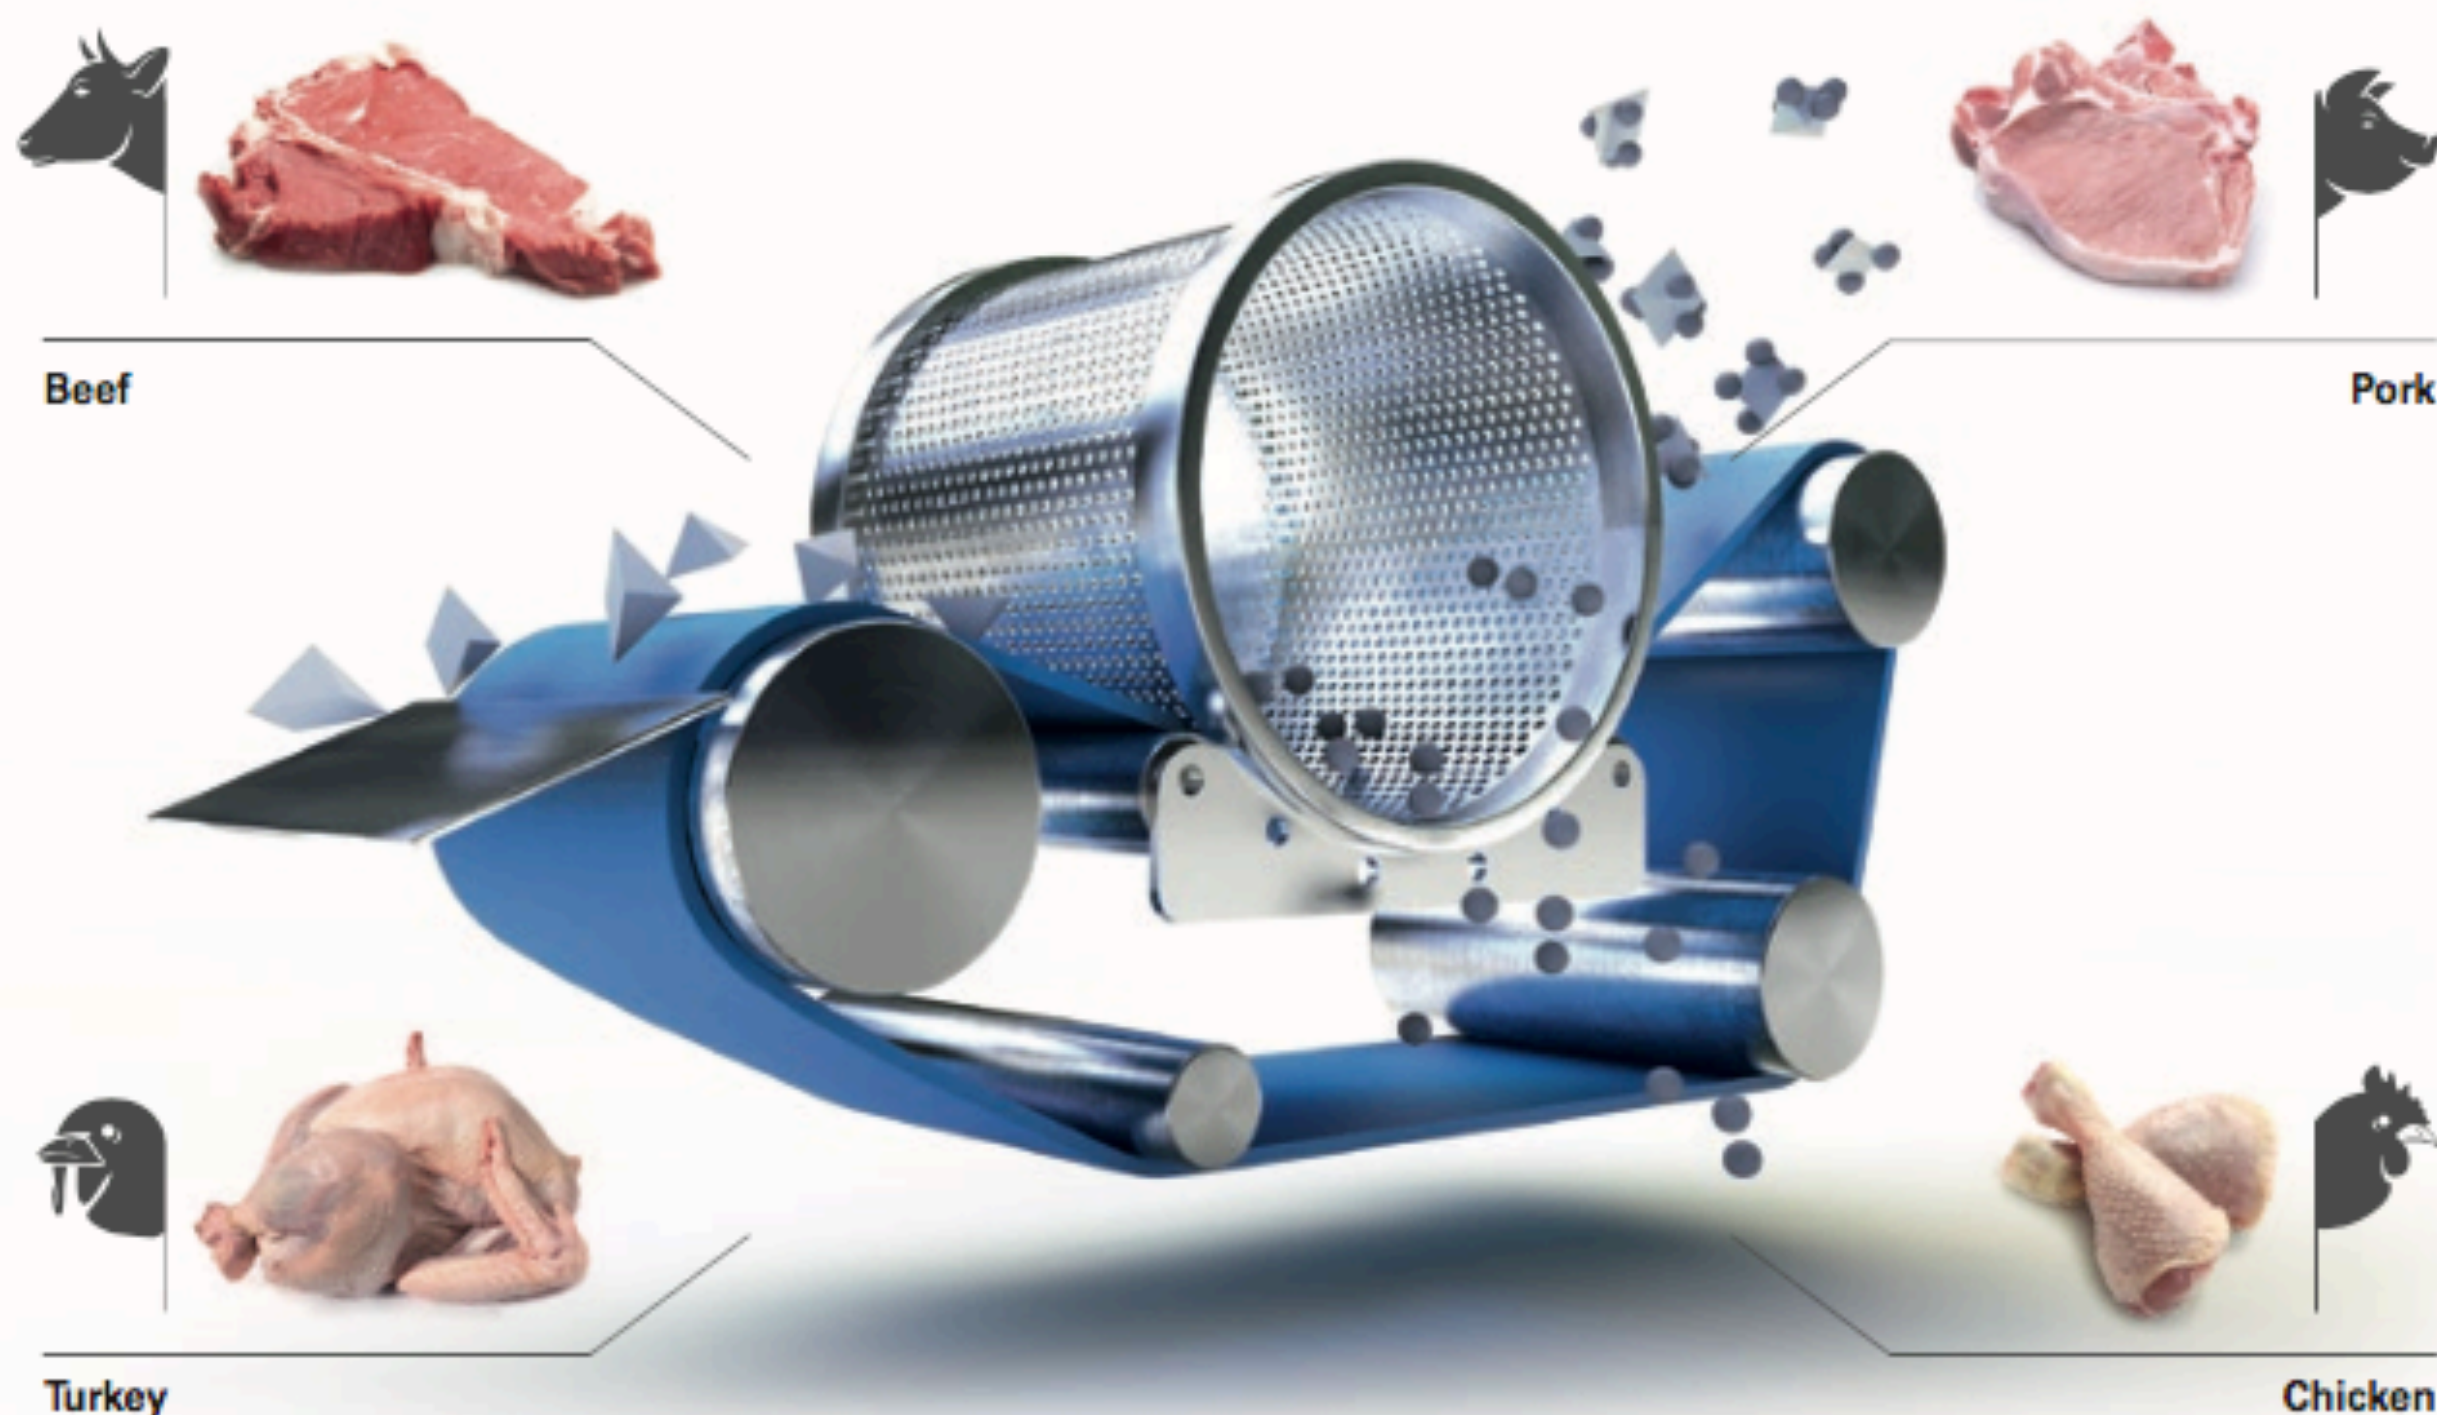

for product separation

# There are belts – and there are Esband belts. Discover the difference.

## Clean separation. Perfectly done.

Our aim of constant improvement has helped us to become a market leader when it comes to endless belts. That's no reason to rest on our laurels, but increases our motivation to come up with further developments and innovations. The new Esband separator belts combine the many years of experience and the know-how of Schlatterer, and are ideal for the separation process involving all types of meat and poultry.

## Quality every time.

We regard it as our obligation to manufacture the perfect endless belt. We strive for optimising it to our customers' maximum benefits. Our top priority is the optimum support of our customers' core business. In product separation it is often the details and the finer points in the production process that ultimately ensure success. Our belts do significantly contribute to this success.

## Separation at the Esband level.

The new Esband separator belts offer many advantages that really pay off in use. Flexibility, quiet running and durability are the main features. Our customer-orientated service offers further advantages by combining knowledge and ability with an understanding of production processes. This is what service and separation at Esband level stand for.

## Our variants. Your choice.

Does your preparation process involve separating meat from bones, cartilage, tendons or feathers?

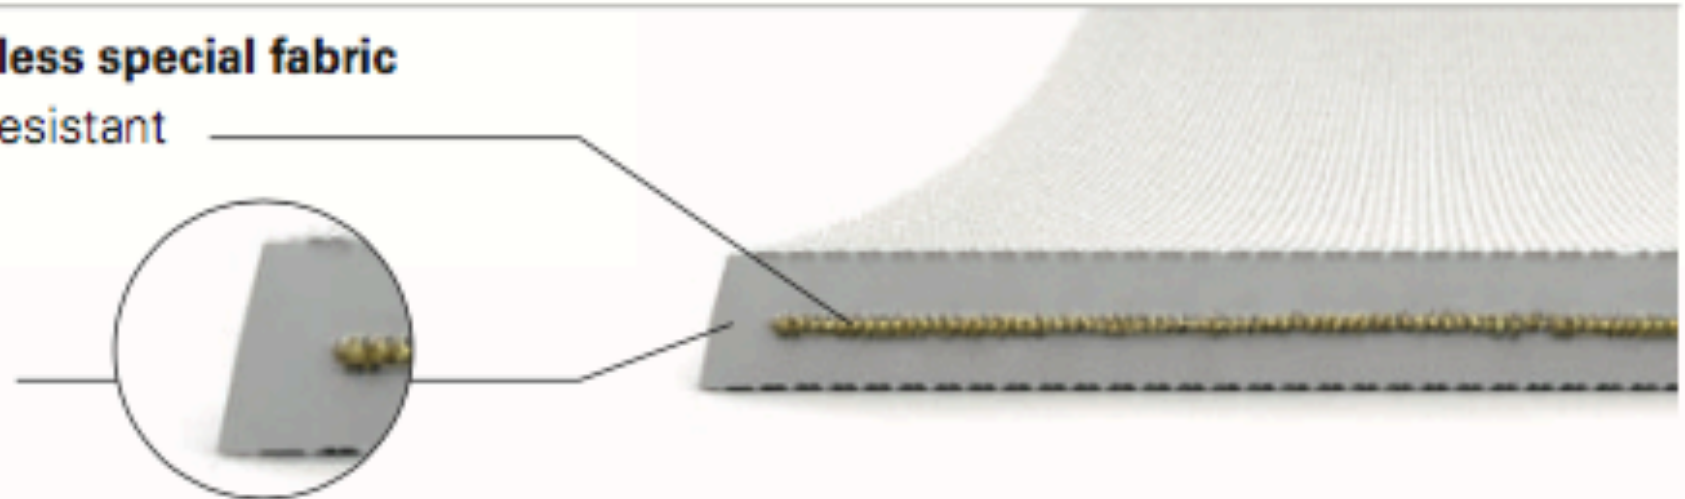

Does the separation equipment work with a roller drive or chain drive?

We can offer you different variants of our belts to suit your own particular requirements.

### Tension members made of endless special fabric

Highly tear-resistant and stretch-resistant

Completely coated  
by **sealed edges**

### Thermoplastic PU (FX)

#### Conforms to FDA regulations

Each available for the outside and running side:

- thermoplastic PU (FX) in 80 Shore A
- thermoplastic PU (FX) in 90 Shore A

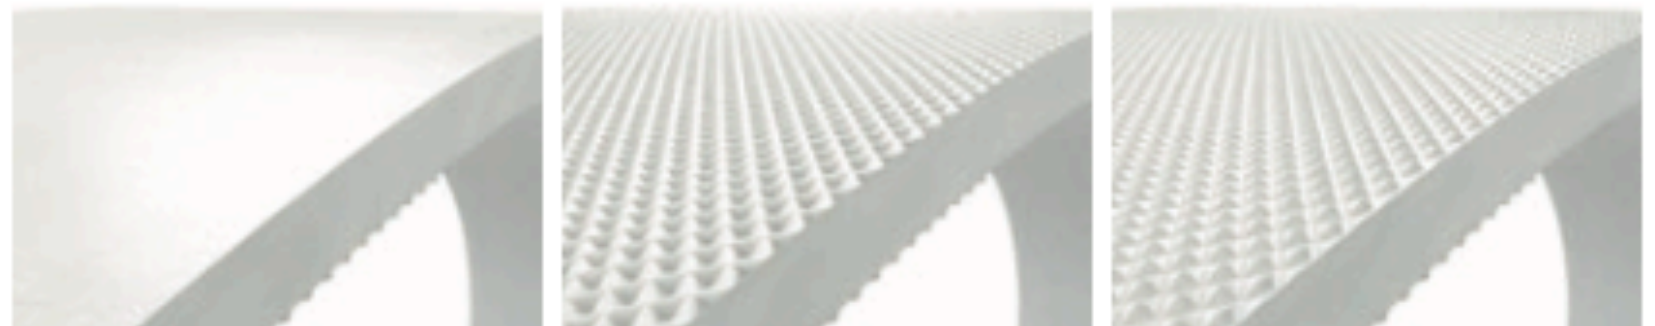

Colours: white or blue

Edges: angled or straight

### Surface texture can be selected for the outside and running side

- smooth
- w-profile
- x-profile

### Specific properties:

- wear-resistant coating
- stable, resistant belt structure
- easy belt cleaning
- temperature-resistant up to 80° C
- very good resistance to oils and greases
- long-lasting
- sealed edges

### Production dimensions:

Length 1300 – 3000 mm, width 150 – 300 mm,  
Thickness 10.0 – 14.0 mm

Do you have any special  
requirements?

We find the right solution for all your needs.
